

RMH SERIES

ULTRASONIC HUMIDIFIER
PORTABLE

RMA
system

PRODUCTS FEATURES

- High humidity production capacity up to 9 L/h
- Droplet size less than 1 micron
- Remote control panel and humidity sensor
- Works silently
- Automatic water level control system
- Low water protection and warning light
- overflow alarm
- Cold steam is produced by ultrasonic humidification. That way it doesn't get wet.
- Thanks to the cold vapor particles smaller than 1 μ , it atomizes with the air in the designated area.

Ultrasonic humidification device is a humidity system that enables water to pass from liquid state to cold vapor state by using ultrasonic sound waves. The humidity obtained by this process is ensured to be dispersed in the room by means of an internal fan. Ultrasonic humidifiers are suitable for use in many industries.

Models

RMH 3000

CAPACITY: 3 LITER
POWER :150W
HUMIDITY 80%-98%
Supply : 220v 1p 50hz

RMH 6000

CAPACITY: 6 LITER
POWER :500W
HUMIDITY 80%-98%
Supply : 220v 1p 50hz

RMH 9000

CAPACITY: 9 LITER
POWER :750W
HUMIDITY 80%-98%
Supply : 220v 1p 50hz
